EXPERIENCE

IMM

Admin Executive

Gurugram, Haryana

June 2025 – Present

- Manage all company social media handles by planning, creating, and publishing engaging posts and reels to boost brand visibility.
- Design marketing visuals and creatives using Canva and Adobe tools, ensuring brand consistency across platforms.
- Perform local SEO, Google My Business (GMB) optimization, and monitor insights using Google Analytics and Search Console.
- Coordinate with the web team for product listings, stock updates, and maintaining SEO-friendly content on the e-commerce portal.
- Prepare monthly digital performance reports and maintain organized documentation for smooth operations.

Skill Savvy Interns

Remote

Front-End Web Development Intern

Aug 2024 – Oct 2024

- Built interactive, responsive UI components using HTML, CSS, and JavaScript to improve usability.
- Collaborated with backend developers for seamless API integration; maintained version control using Git.
- Resolved bugs, improved load speed, and participated in Agile sprints for efficient workflow.

PROJECTS

AMart Store | Node/Express, ReactJS, MongoDB, Cloudinary | ([Demo](#), [GitHub](#))

April 2025

- Developed a full-stack grocery application with complete product management capabilities.
- Used Cloudinary for image hosting and JWT for user authentication and data security.
- Implemented robust error handling and input validations to ensure data integrity.

E-Commerce Website Design | HTML, CSS, JavaScript | ([Demo](#), [GitHub](#))

Aug 2024

- Designed a responsive e-commerce site with product browse, shopping cart, and checkout features.
- Used semantic HTML and clean UI principles to enhance user experience.
- Implemented basic validation and localStorage for session persistence.

Movie Recommender System | Python, Streamlit, Content-Based Filtering | ([Demo](#), [GitHub](#))

July 2023 – Oct 2023

- Built a recommender system that suggests movies using cosine similarity on content attributes.
- Developed with Streamlit for an interactive user interface and easy deployment.
- Demonstrated algorithm design and efficient data processing in Python.
